EXPERIENCE

Research Scientist
Singapore Management University

📅 March 2022 – Ongoing 📍 Singapore

- Co-developed a hierarchical multi-agent reinforcement learning system combining self-organizing and deep neural networks, for simulated defense research technology licensed to DSO National Laboratories.
- Co-lead of the Trustworthy Federated Ubiquitous Learning project under SMU and AI Singapore. Developed a first-of-a-kind self-organizing federated learning system that outperforms baselines by 25% in sparse data clustering and 3-4% in biomedical classification tasks.

Co-founder
Maargo Technologies (discontinued startup)

📅 October 2021 – March 2022 📍 Singapore

- Developed mental health recommendation service for university students. I implemented the front-end and back-end for user verification, profiling, and Question-Answer dialogue handling. We did pilot tests with two Singaporean universities but decided not to continue due to insufficient traction.

Founder-in-Residence (EFSG10)
Entrepreneur First

📅 July 2021 – January 2022 📍 Singapore

Research Scholar
Nanyang Technological University (NTU)

📅 July 2017 – August 2021 📍 Singapore

- Conducted original research on **methods and algorithms for Hierarchical Reinforcement Learning and Planning**, with publications in high-impact venues such as IEEE TNNLS, ACM CSUR, and AAMAS.
- Developed a novel approach for simulated multi-robot hierarchical reinforcement learning for Search and Rescue applications, leading to 50-70% better task-completion performance compared to baselines. This work was funded by ST Engineering. Published in IEEE SSCI.
- Developed a novel end-to-end hierarchical reinforcement learning approach for goal-based navigation and simulated robot control, leading to 30-40% increase in goal achievement rate over baseline. Published in IEEE TNNLS and AAMAS.
- Developed a novel hierarchical planning method for goal-based navigation and simulated robot control, leading to 39-46% improvement in reward-based performance and data efficiency compared to baselines. Published in IEEE TNNLS.

EDUCATION

Ph.D. in Computer Science
Nanyang Technological University (NTU), Singapore

📅 July 2017 – Aug 2021

B.Tech. in Electronics & Communication Engineering
National Institute of Technology, Durgapur, India

📅 July 2009 – June 2013

SKILLS

Analysis and Problem Solving
Research Writing | LaTex
Python | Pytorch | Tensorflow | Keras
Machine Learning | Reinforcement Learning
Deep Learning, CNN, LSTM, RNN
SQL | Data Analysis | C,C++
React | FastAPI | Django

📅 March 2014 – July 2017　　📍 Bengaluru, India

Software Engineer
Samsung R&D Institute India - Bangalore Pvt. Ltd.

📅 June 2014 – March 2017　　📍 Bengaluru, India

- Worked with SRI-B and Samsung HQ on the commercialization and upgrade projects for Galaxy S4-variants, A7, Tab4, and other mid-tier smartphone variants.
- I was part of the Display technology team responsible for board bring-up and device driver upgrades critical for the successful commercial launch of Samsung smartphones in the worldwide market.
- R&D Contribution: Developed a patent-pending algorithm for display composition at hardware level on Samsung smartphones, which reduced power consumption by 6.8% (**patent**: India 4621/CHE/2015).
- R&D Contribution: Developed a power-efficient and fault-tolerant sensor management system for Smart Home IoT sensors with minimal error (average 0.24°C) in temperature prediction. Published in IEEE IACC.

Trainee-Technology
Sapient Global Markets

📅 Oct Oct 2013 – Feb 2014　　📍 Bengaluru, India
